

# Help Us Grow!

**The Friends of Machimoodus and Sunrise State Parks and all the pollinators in the park need your support.**

**We have spent years preparing the garden - removing the trash, getting rid of the invasive bittersweet and poison ivy, amending the soil - and now it's finally time to plant. We have a limited number of "Boulder Beds" ( planting beds surrounding the existing geological assets ) now available for adoption or sponsorship.**

**When completed, Ginger's Garden will augment the existing eco-system by providing food, shelter and habitat for pollinators and other wildlife, including the many Monarch butterflies which frequent the parks' abundant milkweed.**

**For information about ways that you or your organization can get involved, please contact us.**

**We can be reached by email, Facebook or Instagram.**
